On *prep* B), so as to remove the ambiguity of *on, upon*, after certain verbs, e g 'to jump on cloak'. *On to* thus has the same relation to *on* that *into* has to *in* But while *in to, into*, was in use already by 900, the need for *on to, onto* appears not to have been felt before the 16th c , while its written recognition as a combination is still quite recent and limited Yet, in the sense in which it corresponds to *into* in speech a real compound, the *n* being shortened by its rapid passage into the allied mute *t*, while in *on to*, as two words, the *n* is long and does not glide into the *t* But by most writers *on to* is avoided, or used only when ambiguity cannot be otherwise avoided (cf quots 1777, 1837, 1863, 1870, 1873, 1881)

On to and *into* in this sense must be carefully distinguished first from a Mf *onto* a frequent scribal variant of *unto* ; and secondly, from modern instances in which *on* as the extension of *upon*, is followed by *to* as a separate word e g *to walk on* to the next station, to *floss* on to the sea, to *hang on* to a party to *lead on* to another point, a ship *lies broadside on* to the waves. Here the two words are no more connected than in *up to, down to, over to, back to home to* Some who write or print *onto* have care lessly misused it in such connexions

Opportunism (ɒpɒ̈tiū nizm, ɒpɒtiūnizm) [f. Opportune, after F. *opportunisme* see -ism.] The policy of doing what is opportune, or at the time expedient, in politics, as opposed to rigid adherence to party principles, often used to imply sacrifice of principle or an undue spirit of accommodation to present circumstances

A term first of Italian, and then of French politics, which in English use has been extended to characterize any method or course of action by which a party or person adapts him self to and seeks to make profitable use of, the circumstances of the moment (The introduction of the word has often been erroneously ascribed to Gambetta.)

1870 *Contemp. Rev.* XV 389 To lead the [Italian] people away from the idea of unity as Utopian, and induce them [i. e. Cavour and others in 1844] to enter upon the path of compromise or *opportunism* to use their own term 1880 *19th Cent. Apr.* 534 Among Nonconformists there is not one who has less of the spirit of opportunism than Mr. Illingworth 1881 *Standard* 27 May, He [Gambetta] is likewise a master of effect, an adept in the craft of Opportunism in a wider sense than he himself has ever publicly ascribed to a word of his own invention. 1882 A. Inopportunist.)

1881 *Contemp. Rev.* Oct. 6 4 The term Opportunist was first applied to him [Gambetta] by Rochefort, in an article in the *Journal des Hommes Libres* 1882 A. W. Ward 1876 1881 Alfred Herbert in *Times* 29 Sept. 3/6 The opportunist is the man who says I would not, but I must, and who, having said I must, finds that he is neither right nor just but what as he claims is justified and forced upon him by circumstances. 1884 J. Morley *Pop. Ess.* (1886) 11 1077 Called opportunists, as distinct from the opportunists. 1885 M. A *adj* 1 *Grammar* Having the function of expressing wish or desire

Optative mood or *mode*, *optā tivus modus* of the Lat n grammarians, Priscian etc representing ευκτικὴ ἔγκλισις (ἡ εὐκτικὴ τῶν ἑνικῶν) of the Greek grammarians That mood or form of the verb, of which a prominent function is the expression of wish or desire, as in Gr *αι γαρουτο*, 'may it not happen!' It is an original feature of the vb in Aryan or Indo-European (where its sign was the element *i* unaccented *i*, *i y* inserted between the tense sign and the personal endings) It is retained most fully in Sanskrit and Greek and in the so called Subjunctive of the Teutonic langs. The name has also been applied to syntactical forms expressing the sense of the Greek Optative Mood as in L. *utinam ita sit futurum*

1530 Palsgr. 84 The optative mode whiche they use when they wisshe a dede to be done as *ben parle il* wel speke he or well myght he speke. *Ibid* 85 The opt tive mode borroweth also his t enses of the subjunctive 1872 Goulding *Cahyen on Fr* lx 6 Some transpose the preter sence of the verb into the optative mode that it may have a continual pray er 1603 Holland *Plutarch's Mor* 1355 Thus y u see h w in this little word Fi there is an optative power 1748 Simply declined 1752 Harris *Hermes* ii (1786) 16 To speak Sentences interrogative imperative precative or optative 1845 Stoddart *Grammar in Ency l Metrop* (1849) I 53/1 We should not be inclined to separate the optative mood from the imperative were it not that various Languages, and particularly the Greek distinguish it by a separate inflection. 1850 Rawlinson *Anc Mon Babyl* ed 2 I xi 288 Use of the subjunctive mood to express desire Optative and jussive subjunctive.

Optimism (*p* ptɪmɪzm) [n f *optimisme*, in mod L *optimismus*, f I *optim us* best see -ism.]

1 A name given to the doctrine propounded by Leibnitz in his *Théodicée* (1710), that the actual world is the 'best of all possible worlds', being chosen by the Creator out of all the possible worlds which were present in his thoughts as that in which the most good could be obtained at the cost of the least evil Also applied to doctrines of earlier or later thinkers to a like effect.

Leibnitz in his *Théodicée* uses *optimum* as a technical term on the model of *maximum* and *minimum* Hence the Jesuits who conducted the *Mémoires de Trévoux* in the number for Feb 1737 gave to his doctrine the name *optimisme* It appears in the *Dict Trévoux* 1752 It gives its general diffusion to the attacks on the doctrine by Voltaire in *Candide ou l'Optimisme* 1759 and was admitted into the *Dict Acad.* in 1762

1737 *Mém de Trévoux* (Fev) 107 En termes de l'art il l'appelle *la raison du meilleur* ou plus savamment encore et Theologiquement tautant que[cometriquement le système de *l'Optimisme* ou l'Optimisme

1759 Warburton in *W & H's ed's Lett* (1809) 289 The professed design is to ridicule the Optimisme, not of Pope but of Leibnitz. 1788 Watson *Ess Pr Period* xiii II iv 194 That this Platonic scheme, of *Optimism* or the *best* sufficiently accounts for the introduction of moral and physical evil into the world? The words Optimism or *best* are not in the previous edit 1791 Boswell *Johnson* an. 1759 Voltaire's Candide written to ridicule the system of optimism which it has done with brilliant success 1793 Smeaton *Edystl Mar Philos* II ii (1801) 21 By some modern authors the scheme of optimism has been proposed in a form which leads to a justification of moral evil even with respect to the deity 1842 Hussey *Duct* 3 etc. s.v The optimism of Leibnitz was based in the following trilemma —If this world be not the best possible God must either have known how to no, had a better 2 not have been able 3 not have chosen The first proposition contradicts his omniscience the second his omnipotence the third his benevolence

b More generally applied to any view which supposes the ultimate predominance of good over evil in the universe

1842–4 Emerson *Ess Prudence* Wks (Bohn) I 158 One might find argument for optimism in the abundant flow of this saccharine element of pleasure in every suburb 1876 J Sinclair *Mounts* 18 The optimism that may well be considered fanciful is that of Hegel Buckle republicans like Hugo Whitman and the devel opment men generally 1880 Goldw Smith *Peasants in Atlantic Monthly* No 268 136 Besides optimism which affirms the definitive success of good, and pessimism which affirms the definitive ascendency of evil, a third hypothesis is possible. 1888 Mrs. H Ward *R Elsmere* vi xlix, The young reformer's social simplicity his dreams his optimisms 1889 S Alexander *Moral Ord & Progr* II v § 37 227 Morality is therefore of itself and necessarily a kind of optimism 1900 W L Courtney *Idea of Tragedy* 67 A shallow optimism is the last theory of all to which a thinking man ought to consent

B. Signification

1. *generally* A particle co-ordinating two (or more) words, phrases, or clauses, between which there is an alternative

Things so co-ordinated may differ in nature or quality, or merely in quantity, in which case the one may include the other as in 'it will cost a pound or thirty shillings', 'two or three minutes' 'a word or two' The second member may also express a correction or modification of the first, which may be strengthened by expanding *or* to *or even*, *or rather*, *or at least*

b When singular subjects (sb or pron) are co ordinated by *or*, strict logic and the rules of modern grammarians require the vb. and following pronouns to be singular, but at all times there has been a tendency to use the plural with two or more singular subjects when their mutual exclusion is not emphasized

When the subjects differ in number or person, the rule is that the vb and pronouns should agree with the last or nearest, e g 'I or thou art to blame' 'I or thou or he is the author of it (Lindley Murray); but such constructions are apt to seem stiff and pedantic, and are consequently avoided. The question of gender causes further complication—esp the want of a 3rd pers. pron. of common gender To say either 'if he or she has his friends with him' or 'if he or she has her friends with her' may be misleading while 'if he or she has his or her friends with him or her' is clumsy and pedantic which is avoided by saying 'have their friends with them'; so 'Your brother or sister will lend their aid' These difficulties appear to have been felt at all times and have been sometimes avoided by making the verb immediately precede or follow the first subject, and agree with it

2 The alternative expressed by *or* is emphasized by prefixing to the first member, or adding after the last, the associated adverb EITHER, formerly OTHER or OUTHER (the latter still in dialect use) e g 'you may have either an apple or a pear', 'I could eat an apple or a pear either'

The primary function of *either*, etc is to emphasize the perfect indifference of the two (or more) things or courses; e g you may take either the medal or its value the medal and its value are equally at your option, you may take either; but a secondary function is to emphasize the mutual exclusiveness, = either of the two, but not both For full illustration, see EITHER OTHER, OUTHER; the following are early examples of the various forms;

-or, a termination of words, and form of various suffixes, of Latin origin

Latin long *ō* in early OF was represented by a close sound between *ō* and *ŏ*), written variously *a* and *o* as in L *honōrem* OF *anour honour* In AngloF the sound sank into *ŏ*) and came *c* 1300 to be written *on (o uo)* as in *honour* OF *anour honour* (*honur honeur*) The earliest adopted words in ME had *o* or *u* (*our ovur*) but the regular representation was that of AngloF *a* (*anour honour*) In many instances this is still retained but at the Renascence, many of the *-our* words in which in other respects were like their L originals were conformed to the I *-or* and nearly all words taken then or later directly from L were spelt *-or*, though even in these words there was for a considerable oscillation between *-or* and *-our* In Great Britain the latter practice is still written in many of the words in which it was retained in the 16th c. though not a few of these as *ancestor author error horror pro nunciator tailor* are now spelt with *-or* which spelling is extended in American usage to all the *-our* words

This termination appears in the following suffixes

1 *-or* (formerly often *-our*), representing ultimately L *-ōr, -ōrem*, in nouns of conditions from intr vbs in *-ēre* less usually from other vbs as *error, horror liquor, pallor, stupor, tenor, terror, torpor, tremor*, etc. Such of these as existed in ME were formerly spelt with *our*, e g *errour, horrour, lycour, tenour* In other words of the same class, as *ardour, favour, fervour, humour, labour, rigour, valour, vigour* as also in some words not directly connected with extant L verbs, as *colour, honour odour, our* is generally retained in British usage, but American usage spells these also with *-or ardor, favor, labor, color honor*, etc

2. *-or* (formerly often *our*), repr I *-or -orem* of agent-nouns, formed on stems identical with the ppl or 'supine' stems of verbs Of these there are three varieties

a Those repr L agent nouns other than those in *-ātor, -ītor, -ītor, -ŏr*, as *actor, assessor, author, captor censor confessor, doctor, elector, extensor, factor, flexor inventor lictor, oppressor pastor possessor, professor, rector, sculptor, sponsor, tutor, transgressor tutor, victor* These are of different ages, going back to OF words in *-or, -ur*, AF in *-our* F *-eur*, or L in *-or* So far as they existed in ME, they were then spelt *our*, e g *actour, assessour, authour, censour, confessour, dettour, doctour* etc, they are now all conformed to the I spelling in *-or*.

b Agent nouns in L *-ātor, -ītor, -ītor, -ītor*, in coming down in living use into OF., were regularly reduced from *-ātōr-em*, etc., through *-eðor* to *-eor, -eur*, AF *-eour*, which became in ME. *-our*, and in F *-eur*, and thus fell together with those from simple *-ōr-em* in a. Such are *barrator, cessor*, (= *-cessātōr-em*), *conqueror, demor, emperor imperātōr-em*), *governor, juror, lessor, solicitor, vendor, visitor (visitātōr-em)* To this group also belongs *saviour* (AF *sauveour* —OF *salveor, salvedor* L. *salvator em*, which has preserved the vowel before *our* To these may be added agent nouns formed in Fr or AF on the vb stem, in imitation of those in *-eor, -eur, -our*, repr L. *-ātorem, etc*, as *purveyor, surveyor, tailor grantor, warrior* (AF *werreyour*, f *werreier* to war) From want of evidence it is sometimes uncertain whether the agent noun was already formed in late L in *-ātor, -ītor*, or in Fr after these suffixes had been reduced to *-eur* and *-eur*, AF *-our*

c Agent nouns in *-ātor, -eor, -ītor, -ītor, -ŭtor* adopted in later times in Fr, or in Eng, retain *t*, appearing in French as *-ateur, -teur*, etc, and have now in Eng the same written form as in L e g *admonitōr, -ātrix, agitator, creator, curator, dictator, equator, gladiator, innovator, investigator, navigator spectator, translator, vindicator orator, procurator, senator, auditor, creditor, editor, janitor, monitor, servitor executor* These are of different ages some from OF or AF (in which case they formerly had *our, as creatour, creditour, de latour, oratour, servitour*), some of later formation immediately from L which have had the *-or* form from the first The pronunciation varies greatly, the stress being sometimes as in the L. nominative (*crea tor, cre ditor* sometimes on the second syllable before the stressed vowel of the AF and L accusative (on which a secondary stress fell originally in ME.), as in *ad dition, au ditor, au dito rium*) as in (*o ration, orā tion*) or *ōrā tion* (*se nator, se nā tor*), *se nā tion, se na tō rium*) *exe cutor* (*exe cutor, exe cu tō rium*), some times corresponding with that of the Eng vb, as *admi nistrator, a gitator, i nstrator, pro secutor*, or otherwise shifted, as *pro cu rator* In some cases two forms exist, as *cura tor* after L nom, *cu rator* after *cu rātor, cu ratorium*

d *-or* is sometimes an alteration of another suffix, as of I *-ārius*, F *-ier*, AF *-er*, in *ba heloi chancellor, herisor*, etc of Eng *-er* —OE *-ere* in *sailor bettor*

The freq occurrence of ME. *-our* and *-or* as legal terms in stating the principal acting parties in each action upon it *-ee -eg less r lessee grantee grantee mortgagee mortgagor* has imparted a kind of technical or professional character to the ending, and explains the differentiation f *sailor* one who sails professionally from *sailer* In MF there was a tendency to confuse the endings *-er* and *-our* (adopted prob by the OF declension nom *-er* — L *-ātor* acc *-or -ōr-em*, L *-ātrem*) thus *butcher ditcher fisher sailer setter ; ogler porter* etc, are found side with the ending *-our* On the other hand in a large number of words, the original *-our -or* has since the 15th c been exchanged for the *-er* of agent nouns of English derivation such as *barber bowler chamber dancer labourer pleader preacher ; ber runner* or *rhymer* in all which the earlier *-our -or* is the etymological form.

3 *-or* (*our*) sometimes represents F *-oir*, from various sources, as *manoir* OF *manoir, manier*, L *manerie, mirror*, F *miroir*, L **miratorium* so with *our, parlour*, F *parloir*, L **parlatōrium*

4 *-or*, repr ME and AF *-our*, F *-eur*, I *-ore*, a variant of *-tor*, suffix of the comparative degree of adjs, in *major, minor* See -TOR-

Orange (ǫ·rendʒ), *sb*[2]

1. The name of a town on the river Rhone in France, formerly the capital of a small principality of the same name, which passed in 1530 into the possession of the House of Nassau, and so to the ancestors of William III of England, styled princes of Orange Nassau. On the death of William III, the territory of Orange was acquired by Louis XIV, and added to France, but the title continued to be held by the cousin of William and his descendants, who now constitute the royal line of Holland In Eng Hist., 'William of Orange' is an appellation of William III

The accidental coincidence of this name with that of the fruit and colour (Orange *sb*[1]), made the wearing of orange ribbons, scarfs, cockades, orange lilies, etc, a symbol of attachment to William III, and to the principles of the Revolution settlement of 1689, and led to their use by the Orange lodges and Orangemen

'to deal out', 'allot in shares', hence 'to allot or adjudge to one his share, decide, give judgement' The sb has come down in the cognate langs in the general sense of 'judgement, judicial decision', but in OE. had become restricted, in historical times, to ancient modes of trial which survived from an earlier stage of society.

The word has not been found in ME except in a single instance in Chaucer's *Troylus* (perh. from Latin or French). Its modern historical use began c 1575, partly as an Englishing of med L. *ordālium* partly as an adaptation of the OE. word. The true repr of OE. *ordāl* would be *ordale*; the received spelling *ordeal* arose in 16th c. through confusion with the associates the word with *deal* 'part' (OE. *dǽl*). *Or* is best understood for due or right *deal*, for parte, as yet we use it so as *ordeal* is used, and as to any one's *ordeal* at this present it is a word generally used in Germanic & the Netherlands, in stede of dome or iudgement. (*Dec Intell* in. 63) Ignorance of the etymological relationship has led to the pronunciation *or-de-al*, as in *boreal, cereal, lineal*.]

1. An ancient mode of trial among the Teutonic peoples, retained in England till after the Norman Period, in which an accused or suspected person was subjected to some physical test fraught with danger, such as the plunging of the hand in boiling water, the carrying of hot iron, walking bare foot and blindfold between red-hot ploughshares, etc, the result being regarded as the immediate judgement of the Deity Hence applied to analogous modes of determining innocence or guilt, still practised in various parts of the East, and among the less civilized races generally

With the exception of wager of battle which is sometimes included in the class, the various forms of ordeal were abolished in England 1215-16.

2 *spec* A musical instrument (in its modern form the largest and most comprehensive of all), consisting of a number of pipes, supplied with *wind* or compressed air by means of bellows, and sounded by means of keys, which on being pressed down admit the wind to the pipes by opening valves or *pallets*

In the modern organ the pipes are distributed into sets or *stops* of various qualities of tone, the admission of wind to the several stops being controlled by handles or *draw-stops*, drawn in and out by hand or by mechanism worked by special pedals (*combination-pedals*); and the stops are arranged in groups, each separate group forming a *partial organ* (see d) and being controlled by a separate keyboard; these are usually from two to five in number, one of the key boards consisting of *pedals* played with the feet, the rest being *manuals* played with the hands; these can be connected in various ways by *couplers* so as to sound together

From its power and dignity of tone the organ has been distinctively the church instrument from early Christian times, and in modern times is also used in concert halls and other buildings.

The instrument has of course undergone immense changes since the 4th c when it is first referred to in L writers, and

even since the date of the earliest Fug references According to Grove's *Dict Mus* II 576 'At the commencement of the 8th c the use of the organ was appreciated as the art of making it was known in England But although mentioned from that period in Latin documents no Englishque is specifically in this sense are known in OE or Early Me

-orial, a compound suffix, consisting of the suffix -al, L. *-al is*, added to *-ori* , in *ori us, -a, um* (see -ory) The termination is originally adjectival (substantival only by ellipsis), and app arose in connexion with sbs in *-orium, -orius*, Eng. -ory, thus late L had *territori al us* from *territorium*. But it has been extended in Eng to form derivatives from L. sbs in *-tor, -sor*, as from agent-nouns in *-tor, -sor*, as *cursori al, dictatori al, pictori al, piscatori al, procuratori al, professori-al, sastori al, senatori al*, and others formed directly on agent-nouns themselves or on the cognate ppl stem of the vb, as *equatorial, mediatorial* In sense, these adjs in *orial* are usually identical with those in *ory*, and the two forms are not rarely found side by side (e g *piscatorial, piscatory*); but the former is preferred for the adj when there is a sb in *ory* (*purgatory, purgatorial*) Words in *orial* from agent-nouns are chiefly of Eng formation, the compound suffix being rare in Fr

Oriel (*o*·rĭel) Also 5 **oryel, oriell,** 5–6 **oryall,** 6–8 **oriall,** 7 **orial, oryal,** 7–8 **oriol,** (9 **oriole**) [Mf. a. Of *oriel (eurieul, oeurieul* (in Godefroy) 'porch, passage, corridor gallery', med L. (? from Fr) *or iolum* (in Matt Paris, *a* 1259) 'porch, entrance hall, antechamber']

Of unknown origin for the conjecture that the F or med L might be altered from I *auroulum* 'golden ovlet,' in sense 'gilded chamber, there is no historical foundation; the Fr forms in *eu, eau* point to an original *ō not ou*]

Although much research has been expended upon the history of this word and esp. upon the development of the current use in *oriel window*, the sense history remains in many points obscure and perplexed. Mr W Hamper in an exhaustive article in *Archæologia* XXIII (1831) 114, asserts, and app. proves, for *oriel* the senses, penthouse, porch (attached to an edifice), (detached) gatehouse, loft, upper floor, gallery (for minstrels) It is also shown in Parker's *Domest Archit*, that the name was applied to a gallery or upper chamber in the west end of a domestic chapel, or to a small private apartment having a window looking into the chapel (see also *Bentley's Qu Rev* 1860 Jan 497) The earliest sense known is that of 'portico, passage, corridor, gallery, assured from OFr (Godef) and med L., and it is probable that 'oriel window' meant at first 'window in a gallery or balcony' Most of the earlier senses claimed by Mr Hamper are found only in L. context, examples in Eng being scarce. The modern Cornish use of *oriel* is however an important link.

2 In *chemistry* a *Ortho* is used to distinguish one class of acids and their salts from another denoted by the prefix *meta-*, which contain the same elements in different proportions, the *meta*-acid containing a molecule of H_2O less than the *ortho* acid, the *ortho* salt being also the more basic and the *meta*- salt the less basic Thus *orthophosphoric acid* H_3PO_4, *metaphosphoric acid* HPO_3, *sodium orthophosphate* Na_3PO_4, *sodium metaphosphate* $NaPO_3$ So *orthosilicic*, *orthotungstic*, *orthosilicate orthotungstate*, etc This use of *ortho* originated with Prof Odling in 1859, *meta* having been introduced by Graham in 1833 b With the names of isomeric benzene di derivatives, *ortho* is applied to those in which two constituents hydrogen atoms are replaced by another element or radical, as distinguished from *meta*- and *para* derivatives, in which the two atoms are not consecutive, but unsymmetrically or symmetrically dispersed respectively Examples *orthoditrobenzene*, *orthobromotoluene*, *orthopropylphenol*, *orthoxylene* (This was introduced by Kormer, 1867, in *Brussels Acad Sc Bull* XXIV 166 189 2)

As *ortho* although usually prefixed without a hyphen has always its own distinct meaning, there is no reason why *ortho* acid (especially treated in this Dictionary)

Ose, obs form of OOZE

-ose[1], a suffix representing Latin *-osus*, forming adjs. from substantives, with the meaning 'full of', 'abounding in', e g. *anim-osus* full of fury, *clām-osus* screaming, *cōpi-ōsus* rich, *pecūni-ōsus* moneyed, *rēligi-ōsus* scrupulous As in living suffix *-ious* came down to OE as *-ei, -es*, later *-eus, -eos*, AF and Eng *-ous* (ME. also *-ous*), which survives with pronunciation (*-əs*). But from the 14th c onward there was a tendency to alter *-ous* words to *-ose* after L., as seen in such forms as *ambitiose, gloriose, malitiose, pompose, virtuose, wilde* None of these displaced the earlier forms in *-ous*, but a few words formed directly from L from the

15th c onward have taken their place in the lan guage, as *balbuties*, *globose* (18th c.), *jocose*, *morose*, *verbose* (17th c.), *otiose* (18th c.), *grandiose*, *pulose* (19th c.). In a few cases *-ous* and *-ose* forms are both in use, e g. *acerous*, *acerose*, *acinous*, *acinose*, those in *-ose* being more technical. Originally these words have the stress on the suffix, *joco se*, *morose*, but this is not always maintained in more recent usage, esp in words of more than two syllables Nouns of state from these adjs, as from those in *ous*, end in *-ossty* *globosity*, *verbosity*.

-ose^{2}, *Chem*, a suffix originating in the ending of the word *glucose*, and employed in forming the names of the related carbo-hydrates, *saccharose* and *cellulose*, with the isomers of these, as *dextrose*, *levulose*, *dulcose*, *galactose*, *mannitose*, *lactose*, *maltose*, *melezitose*, *melitose*, *mycose*, *synanthrose*, *trehalose*, *amylose*, etc.

These formations are due to the French chemists, and the earlier of them appeared first as Fr words *Glucose* was so named by the committee of the *Académie des Sciences* (Hénard, Gay Lussac Biot, Dumas) who reported 16 July 1838 upon the mémoire of Peligot il résulte que le sucre de raisin, celui d amidon, celui de diabetes, et celui de miel constituent un seul corps, que nous proposons d appeler *glucose* (*Mole* γλυκος [mspr χυλ, molt, un doux *Comptes Rendus* VII 108 (1838)) *Inulose* was thus merely a frenchified representation of the Gr word γλυκυς must, sweet wine, sweetness, with *u* for *ευ* and *ose* for *-οε* (Littre s assumption that the term was derived from γλυκυς sweet, in accordance with which he essayed to alter it to *glycose* was thus historically erroneous.) The name *cellulose* was given by Braconnot, Pelouze and Dumas in reporting upon the memoire of Payen 14 Jan 1839 En effet, il y a dans les bois le tissu primitif, nommé avec l amidon, que nous appellerons *cellulose* et les plus nouveaux qui en remplit les cellules, et qui constitue la matière ligneuse véritable' *C R* VIII 51 (1839) *Cellulose* was thus formed on *cellule*, but there is no evidence that its inventors thought of a L adj **cellulosus*] and app the ending *ose* was given simply to match *glucose* It appears from other statements that the actual author of *glucose*, and presumably also of *cellulose*, was Dumas, the *rapporteur* of the committees. The ending *-ose* was soon extended ; contractions of *levo-glucose* (Berthelot) and *d.-extro-glucose* (Kekulé) gave *levulose* and *dextrose*, and the forms *lactose*, *melit se* etc. followed

Osse, oss (*ɒs*), *v.* Now *dial* [Found in w mid dialect in 14th c., and still common from the Welsh Border to Cumberland and Northampton, much affected by Ph Holland in his versions of Latin authors to render *omnari* and its synonyms, as is Osse *sb.* to render *omen* The latter has not been found in previous writers, though Holland (who, as Head Master of Coventry Free School, had oppor tunity of knowing the facts) refers to both sb and vb as old words well known in the North See Osse *sb* (not 600) According to the known evidence the sb appears to be derived from the vb, but the origin of both is involved in obscurity

Holland was confirmed in his use of these words by be heving that they be derived from Gr *ὄσσα* ominous voice or sound, prophecy permonation the circumstance of which and its vb *ὀσσ-ομαι* to presage, foretoken forebode with *esse* sb and vb is certainly very remarkable yet it is impossible that an English vb in popular use in the 14th c. could be derived from Greek without many intermediate links of which no traces are known Whether the also most colloquial Welsh as *ust* to give tokens of shew as Ware, this is merely a recent adoption from the adjacent English *osse* (Ray's conjecture of identity with F *oser* to dare (founded on a modern dialect use) is phonetically and historically futile)]

The *ossifraga* of Pliny is identified by modern naturalists with the Lammergeyer, which is also called Ossifrage, and is said to let them fall from a great height upon rocks and stones so as to break them But the name appears to have been early transferred in France and England to the Fish hawk, to which, in its assumed modern forms *osprey*, *ospray*, it is now applied. *Ossifrage* has subsequently been taken directly from the L form neither simply to render the L, or to name the bird held to be meant by Pliny, but has sometimes been used merely as a synonym of Osprey (In modern Ornithology, *Ossifraga* has been awkwardly taken by Bonaparte as generic name of the Giant Fulmar, a bird of the petrel family) See also Osprey

† **Other,** *conj* and *adv* 2 *Obs* Forms 2–5 **oþer,** 2 6 other, 4–5 opere, othire, othir, yr(e, 4–6 uther, 6 oder, ur. *B* 4 ojber, other [The OE. word for 'or' (*F. ou, L. vel*) *aute-tem, -ve, -vel* was *oððe*, earlier *oððer* (also *-ðde*). Goth *aiþþau*, OS *eppo oddo*, OHG *eddo, edo*, later *ado*, MHG *ode, oder*, Ger *oder* The alternative 'either ... or' was expressed by *oððe ... oððe*. This form was superseded c 1130 by *oðer* (first in O. I Chron., anno 1127, last example of *oððe* in a sentence in which *oðer* also occurs, 1131) The ME. of the 13th century had *eiþer ... oþer* (1200–1225) has regularly *oððer* for OE. *oððe*

Though the date of the first appearance of this conj. is so narrowly defined, its actual source remains a debated question It has been held to be derived from the adj. pron Other (see prec), and (more frequently) with the adj. pron Other, OE. *ðhwæðer, ðwæðer, ðæðer* Both these pronominal words were indeed in OE. used substantively to introduce the alternative *oððe* (see Other A. *adj. pron* B 1 b, Other *adj. pron* 1 b) but there is no trace in OE. of *oðer* (*ðher*) or *ðher* taking the place of the first member of the alternative *oððe ... oððe*. The much less of both members, and least of all of the simple conj. *oððe* On the contrary the simple conj. remained invariably *oððe*, and the alternative (so far as the evidence shows) *oððe ... oððe* down to the abrupt substitution of *oðer* c 1130 It is true that in the 14th c., in northern, north mid and e. mid Eng., *auper, ouper*, began to take the place of *oðer* as the first member of the alternative *oðer ... oðer* or (the second remaining as *or*, less usually *oðer*), just as later still (in Wyclif and Chaucer) *either* became the ordinary form of the first member: but these were changes several centuries later than the substitution of *oðer* for *oððe* c 1130 with which they have no historical connexion It seems more probable that the *oðer* or *oþer* of 1130 was a modification of *oððe* itself due to some association with words in *-er* ðhwæðer being a streaklest word was probably reduced in pronunciation to *oðe* (cf. *Oþ-nales* from *nalles ðhen* (1140) from *nallðan*, etc) Thus we are reminded of the parallelism of development between HG. *ode, ado, oder, ader*, and OE. *oððe, oðða, oððe, (*aðer, oðer* or *oþer*, and are led to suspect for the *r* of German

oder and of ME *ođer* the same or a similar explanation. The form *ođđer* used by the early 13th c scribe of Περὶ διδάξεων may either be his accommodation of the *ođđe* of his original to the *ođer* of his own day, or an actual intermediate form. It does not seem possible to fix the quantity of the *o* in ME *oþer*, even from Ormin's spelling, but if derived from *ođđe*, **ođe*, it was presumably short. Ormin's reduced form *oþþr* and *orr* (see OR *conj*), and the later *or*, had, of course, short *o*, from which the *ǫ* of mod. emphatic *or* is regularly developed.

III As auxiliary of predication

5 The general verb to express duty or obligation of any kind, strictly used of moral obligation, but also with various weaker shades of meaning, expressing what is befitting, proper, correct, advisable, or naturally expected. Only in pa t (indic or subj), which may be either past or present in meaning (The only current use in standard Eng)

The subject is properly the person (or thing) bound by the obligation which latter is expressed by a following infinitive (with, formerly also without, *to*) sometimes omitted by ellipsis. Followed by a passive infinitive, it expresses obligation on the part of some undefined or unexpressed agent the subject in this case being the person etc to whom the obligation is due (e g *parents ought to be honoured* = it is a duty to honour parents)

a In past sense = Owed it to duty, was (were) bound or under obligation (*to do* something) Usually, now only, in dependent clause, corresponding to a preceding past tense in principal clause *he said you ought* = he said it was your duty (Cf c below)

a *c* 1200 ORMIN 10108 Annd tohh swa þehh ne cnew himm nohht Þe werelld alls itt ahhte. 1297 R GLOUC (Rolls) 4135 Vor he truste to hom mest as me þincþ he wel aȝte *c* 1300 *Havelok* 2787 Yif þat she aucte quen to be 1382 WYCLIF *Isa* v 4 *c* 1425 WYNTOUN *Cron* VIII ii 52 Robert þe Brwys, Erle of Karryk Aucht to succeed to þe Kynryke.

b In present sense = Am (is, are) bound or under obligation, *you ought to do it* = it is your duty to do it, *it ought to be done* = it is right that it should be done, it is a duty (or some one's duty) to do it (The most frequent use throughout Formerly expressed by the pres. t, OWE *v* 5)

This appears to be orig the pa. subj (which in ME and mod Eng has the same form as the indic.) used first in hypothetical or general cases e g Ought one to tell the truth under all circumstances? If it should rain he ought not to go. If he cannot go to-day he ought to go to-morrow Thence, in definite present sense as Tell me what I ought to do now The use of the pa. subj softens the form of the expression cf the parallel *you should* for *it is your duty* also *would you* for *will you*, *might I* for *may I*; *could you* for *can you*

Ounce (ouns), *sb.*[1] Forms 4–6 unce, (5 vunce, unch, once, owns, ouns, nouns, nowns, nonsse, oyns, 6 ownce, oonce, olnce, ounc, ownohe), 5– ounce [a. OF *unce* (12th c. in Littré), *ł once* —L. *uncia* twelfth part (of a pound or a foot). The L. word was already adopted in Ob. in the form and sense of *ynce* str m, Inch, in late OE. it also appears as *yndce*, *ynce* wk fem, ounce; but the existing word is from French]

1 A unit of weight, originally, as still in Troy weight, the twelfth of a pound, but in avoirdupois or ordinary goods weight the sixteenth of the pound.
The Troy ounce consists of 480 grains, and is divided into 20 pennyweights; the avoirdupois ounce contains 437 5 grains, and is divided into 16 drams. *Fluid ounce*, a measure of capacity, containing an avoird. ounce of distilled water at 60° Fahr (= 28 4 cubic centimetres). In the United States the fluid ounce is the quarter of a gill or 128th part of a gallon (= 29 57 cubic centimetres), containing 456·933 grains of distilled water at its maximum density It is thus an aliquot part of the pint, quart, and gallon, which the British fluid ounce is not.

-ous, *suffix*, repr L *ōs us* (*a, um*), forming adjs, with the sense of 'abounding in, full of, characterised by, of the nature of', e g *copi ous* as plentiful, copious, *dolōr-ous* as full of sorrow, dolorous, *fām ous* as famous, *gener ous* as distinguished by descent, generous, *glōri ous* as full of glory, glorious, *spin-ōs us* as full of thorns, thorny spinous *vis ous* as of the nature of bird lime, sticky, viscous, etc

Latin stressed long *ō* passed in OFr into a closer sound, intermediate between *ō* and *ū*, which was variously written *o* or *u* less commonly *ou* hence ME adjs in *-dus* which either came down in popular use or were adopted at an early date, had in OF forms in *os, or us* (*ous*, e g *coveitos us, doleros, us envios us glorios, us, religios us* In the 13th c the vowel sound had changed to (*ø*) written *eu* so that the suffix had now the form *eus* (*coveiteus dolereus, envieus glorieus* etc) and this still later was written in the masc *eux* (*coveiteux, envieux, glorieux* with fem however in *euse*) as still in modern F In Anglo Fr and early ME. the forms were the same as in early OF (*coveitos us, envios, us glorios us*) but the vowel was soon identified with OE. long *u* and like it written after 1300 *ou* (*coveitous envious, glorious*), the spelling ever since retained though the sound has passed through (*u us*, us) to *əs, əs* This *ous* having thus become the form of the suffix in all words from Norman Fr became the established type for all those of later introduction, whether adaptations of Fr adjs in *eus* or L adjs in *ōsus* but see one 3 or new formations on the analogy of these, from Fr or L, or other elements.

These new formations are numerous in the Romanic languages In French they have been formed freely, not only from L sbs. which had no such derivative in ancient L but also from French words themselves of L origin, and from mediæval and modern words from divers sources. Many of these new formations have been earlier or later transposed (with change of *eus* etc to *ous*) from French into English Such is the history, for example, of *advantageous adventurous courageous dangerous, gelatinous grie ous gummous, hazardous hideous joyous, lech rous mattrous mountainous orgu llous pulpous ra enous, riotous slanderous* This process has been continued in Eng itself, where new adjs in *ous* have been formed not only on Latin Greek and Romanic bases but also on native Eng words and on some of obscure origin e g *blusterous boisterous lu denous feverous murderous poisonous slumberous, thunderous timous troublous wondrous*

In some words in late or mod L the ending *ōsus* was added to an adj or vb last stage *-ōsus* is found beside the simple adjective e g *decor us, de or s us dubi us dubiōs us* in *It decoro, decoroso dubbio dubbioso* In the Romanic languages a few new forms of this kind appear e g L *pi us* Fr *pieux* (as if from **pi us*) But in English this addition of the suffix has been greatly developed and has become the ordinary mode of anglicizing L adjs of many kinds esp those in *-ent, -ans, -ans et ris ax ic ic al ous endus, ulus vorus cious ci, ajue ous igne ous extrane ous, herba e ous cons i ou al ous cu ous ardu ous exigu ous adultes ous auersæ ous armiger ous, alacri ous hila i ous illustri-ous, capaci ous fe ous ous, stupefa ou gr ui ous omnivor ous sonor-ous*

This tendency to represent L *-ōsus* by an Eng form in *-ous* may have been strengthened by the fact that the dictionary form of the L adj is the nom sing masc and that this in the majority of adjs ends in *us* the Eng pronunciation of which is the same as that of the Eng word in *-ous* so that the latter to the curs ry observer appears to be merely an Eng spelling of the L. It is evident however that *igne ous*, for example answers not only to L. *igne us*, but to *ignei gne um* etc and that the *ous* is an additional element And in comparing *alacri ous* with *alacer hilari ous* with *hilaris capaci-ous* with *capax*, the suffixal nature of the *ous* is manifest

b In some words *-ous* is a corruption of another suffix, e g in *right ous wro ongous courteous gra ous*, in others, as *bounteous* a contraction of an earlier suffix has taken place before *ous* see eous

c In *Chem* adjectives in *ous* formed on the names of elements, in acute acti ls and other compounds containing a larger pr portion of the element in question than those expressed by an adj in *ic* e g *chlorous* acid *sulphurous* acid *cuprous* oxide *ferrous* salts etc see ic I b

d Nouns of quality from adjs in *ous* (however derived), are regularly formed in *-ousness*, as *courteousness conscientiousness gorgeousness, righteousness* those from L *us* have sometimes forms in *-osity*, as *curiosity generosity porosity viscosity* but this termination more frequently accompanies adjs in *-ose*]
